

BOXES

HOW TO PLAY

1. The first player takes a turn drawing a line between two dots. Once the line is drawn the next player takes their turn, and so on until everyone has taken their turn.
2. The line can only be Vertical (Up and Down) or Horizontal (Left and Right) however a line will never be NEVER diagonal. Possible directions :

3. The object of the game is to be the player than closes the most boxes. Closing a box is when you are the player that draws the fourth line on the box. Once you have closed a box then the player puts their initials in the box. Like this:

COMPLEXITY: EASY
NEEDED ITEMS: PENCIL

4. After the player initializes the box they must draw one more line. This line can be anywhere. If the line that is drawn closes another box then that player will continue with additional line, and so on until they can no longer close a box.

5. Once all the dots have been connected the game is over. The person who has the most boxes wins!
